

Privacy

Overview

04 Feb 2026

- establish and understand what privacy means
- explain how privacy is “networked”
- identify privacy violations in academic research
- complicate existing regulation using a networked privacy framework

Affordance

- the capabilities of a technology which can both enable or constrain action

Affordance Theory

- our interactions with technology are not only shaped by the technology’s capabilities, but also in the ways that we interpret and utilize it

Features that Affect Privacy	• settings • public visibility • defaults being restored during updates • persistence • exaggerated claims of privacy (🚫) • “invisible audiences”
Context Collapse	• the flattening of multiple, distinct audiences into a single, shared context, typically on social media https://journals.sagepub.com/doi/10.1177/20563051211041646
	• assess the risk of non-compliance
